

# ENERTEQ

Pay less in the electricity  
bill with guaranteed results

UP TO 20%  
SAVING

enerteq!

5 years warranty and 20 years service  
life

Payback period less than 18 months

No maintenance required

## What is ENERTEQ?

- ENERTEQ is a high system for energy saving that reduces the electrical power consumption providing more stabilizing and optimizing the incoming electrical current.

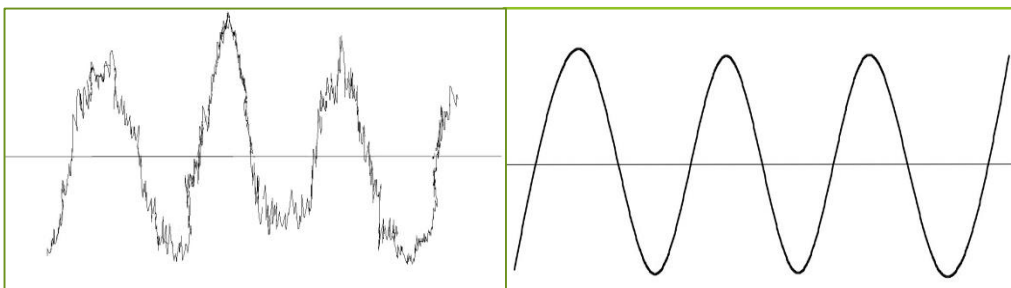

## How does it work?

- Stabilizes the input voltage to the nominal voltage.
- Reduces the voltage spikes produced during the start engines, air conditioning, electrical appliance, etc.
- Removes the harmonic distortion and noises in the electrical signal.
- Reduces the impedance caused by factors such as voltage unbalance between phase and neutral

**KEIKEN**  
ENGINEERING

More than 10 years of experience  
installing ENERTEQ devices

More than 50 references in energy  
projects with ENERTEQ devices

Audited Results

**ENERTEQ  
BENEFITS**

Fast and easy  
installation without  
electricity provider  
change

Improves the service life  
of electrical appliances  
protecting them from  
surges

5 years warranty with  
payback period less  
than 18 months

20 years of service life

Without maintenance

**Certifications**

## Results

Reduces the consumption in the electricity bill, increasing the electrical appliances service life and improving the electrical current

Guaranteed results visible in the first electricity bill

We can carry out a free study the potential of savings in your installation as well as the investment payback period. Quick Answer

### Madrid Head Office

Av. Fuencarral, 44 Edif. 7  
28108 Alcobendas - Madrid.
